PROFILE

Software Analyst graduate in ORT University with 2 years of experience as a Full Stack Developer at IBM. Skilled in designing, developing, and maintaining desktop and web applications using technologies such as .NET, Entity Framework, SQL, Angular, and Java. Motivated by continuous learning and teamwork, with the ability to quickly adapt to new environments and contribute to innovative projects that create real business impact.

PROFESSIONAL EXPERIENCE

Full Stack Developer, IBM Uruguay   **Oct 2021 - Aug 2023**

- Developed and maintained a desktop application for the financial sector, built on a Java-based client platform, enabling account management, financial reporting, and payment processing.

- Designed and implemented a full stack web application with .NET, Entity Framework, SQL and Angular, streamlining internal processes and reducing execution times for key client tasks.

- Fixed critical bugs and improved application performance, ensuring stability and scalability of production systems.

EDUCATION

Software Analyst, ORT University Uruguay   **Mar 2020 - Nov 2023**

- Training in software development, databases, and systems analysis, with a focus on object-oriented programming, web development, algorithms, and data structures.

- Final project: full stack web application for a cake shop, developed with Node.js, Express, Next.js, Prisma, and MySQL, including authentication, product management, and order system.
